

# Coronavirus Disease 2019 (COVID-19) in the U.S.

Updated March 5, 2020

**This page will be updated regularly at noon Mondays through Fridays. Numbers close out at 4 p.m. the day before reporting.**

CDC is responding to an outbreak of respiratory illness caused by a novel (new) coronavirus. The outbreak first started in Wuhan, China, but cases have been identified in a growing number of other [locations internationally](#), including the United States.

## COVID-19: U.S. at a Glance\*

- Total cases: 99
- Total deaths: 10
- States reporting cases: 13

\* Data include both confirmed and presumptive positive cases of COVID-19 reported to CDC or tested at CDC since January 21, 2020, with the exception of testing results for persons repatriated to the United States from Wuhan, China and Japan. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

## COVID-19: Cases in the United States Reported to CDC\*†‡

Travel-related	30
Person-to-person spread	20
Under Investigation	49
<b>Total cases</b>	<b>99</b>

\* Data include both confirmed and presumptive positive cases of COVID-19 reported to CDC or tested at CDC since January 21, 2020, with the exception of testing results for persons repatriated to the United States from Wuhan, China and Japan. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

† CDC is no longer reporting the number of persons under investigation (PUIs) that have been tested, as well as PUIs that have tested negative. Now that states are testing and reporting their own results, CDC's numbers are not representative all of testing being done nationwide.

‡ As of March 4, 2020 1,526 patients had been tested at CDC. This does not include testing being done at state and local public health laboratories, which began this week.

## States Reporting Cases of COVID-19 to CDC\*

\* Data include both confirmed and presumptive positive cases of COVID-19 reported to CDC or tested at CDC since January 21, 2020, with the exception of testing results for persons repatriated to the United States from Wuhan, China and Japan. State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

## COVID-19: Cases among Persons Repatriated to the United States

	Positive
Wuhan, China	3
<i>Diamond Princess Cruise Ship</i> <sup>¶</sup>	46

<sup>¶</sup> Cases have laboratory confirmation and may or may not have been symptomatic.

## Public Health Laboratory Testing for COVID-19

This map includes states and territories with one or more laboratories that have successfully verified and are currently using COVID-19 diagnostic tests. This list is provided by the [Association of Public Health Laboratories \(APHL\)](#). Contact your [state health department](#) regarding questions about testing.
